Keeping the mall safe during pandemic

Huge Open Spaces

The sheer size of shopping centers – equivalent to multiple football fields in most cases – naturally allows for social distancing. Increased safety measures are indicated on signs help guide one-way traffic and keep guests at least 6 feet apart.

Hospital-Quality Air

CDC-recommended, hospital-quality MERV 13 air filters that capture airborne viruses in all indoor common areas. High ceilings provide more space for air particles to move around and thin out.

CDC-Level Cleaning

Intense and frequent cleanings of high-touch surfaces are done before and during operating hours with CDC-recommended products. Guests have access to touchless doors and hand sanitizer throughout the center.

Controlled Capacity

The number of people at the mall is monitored in real-time. Signs are posted to notify shoppers when the mall is at capacity. Signage throughout the center indicates capacity limits and dining area limitations.

5 & 10 k Directions

1. Circle the inside of the mall upstairs and downstairs—including all side entrances to doors and back—six times each floor for 10K or three times each floor for 5K.
2. You may want to vary directions between counterclockwise and clockwise around a floor and change floors every few rounds to enjoy a variety in the appearances of shop windows.
