

TOM CRABILL

These are your personal, single use, stamps for this event. They should have your name on the stamp, and that should match the name on your books. The stamps on this PDF are for all of your IVV and special program books, one per book. You may print more pages if you have a lot of books. Additional copies of this specific stamp (security code) in a book will be invalidated.

These "cut and paste" stamps have a simple but effective security built in. Below you can see the security. The stamp includes an issue date, your name, and a single use security code. The name on the stamp must match the name on the book otherwise the stamp will not be accepted. We do this to obviate the need to protect unused stamps. You may discard them any way you wish. There is no value in keeping the unused stamps because the security code is for a single use in any book.
