6km,10km,16km,24km,34km

This map and directions may only be used in conjunction with a signed American Volkssport Association (AVA) athletic waiver. All other uses are prohibited.

IAT Alliance Snapshot: This route highlights both ancient and current shorelines of Lake Michigan.

Start/Finish Point: To Neshotah Park. From Two Rivers WI at intersection of Washington St. and 22nd St., take 22nd St. east until it ends. Hiking trail to the north will be in the Point Beach State Forest for the most part.

GPS: 44°09'05.6"N 87°33'16.1"W 44.151567, -87.554482

Hike Options: Seasonal restrooms and water at the Start Point.

6km Linear route: Southwest through Two Rivers crossing both rivers in Two Rivers to Columbus St. one-way if two cars, or meeting a driver. Follow map and yellow blaze markings.

16km See above, when reaching Columbus St. turn right to Zander Park, turn and return. (Seasonal restrooms & water.)

10km Follow trail north, with Lake Michigan on your right. Follow trail until it turns away from lake, turn around & return.

24km * Follow trail north, with Lake Michigan on your right. Follow trail until you reach the Rawley Point Lighthouse, turn and return.

34km * Follow trail north, with Lake Michigan on your right. Follow trail passing the Rawley Point Lighthouse, pass camp grounds and continue to end of trail at Lake Shore Rd., turn and return.

Alert: * In 2017 the section mid-route where the trail leaves the lake heading inland and returns to the lake was washed out. Repairs were planned, but timing of those repairs was unknown as of this writing. What we did in 2017 was returned to the car at Neshotah Park, then drove to Lake Shore Rd., parked and walked south until we again could go no farther, then returned to the car and computed our actual walking distance. Warning: When hiking the northern section in 2017 we encountered almost unbearable mosquitoes.

AVA Special Program: Wisconsin Ice Age Trail (WI IAT) Regional Program.

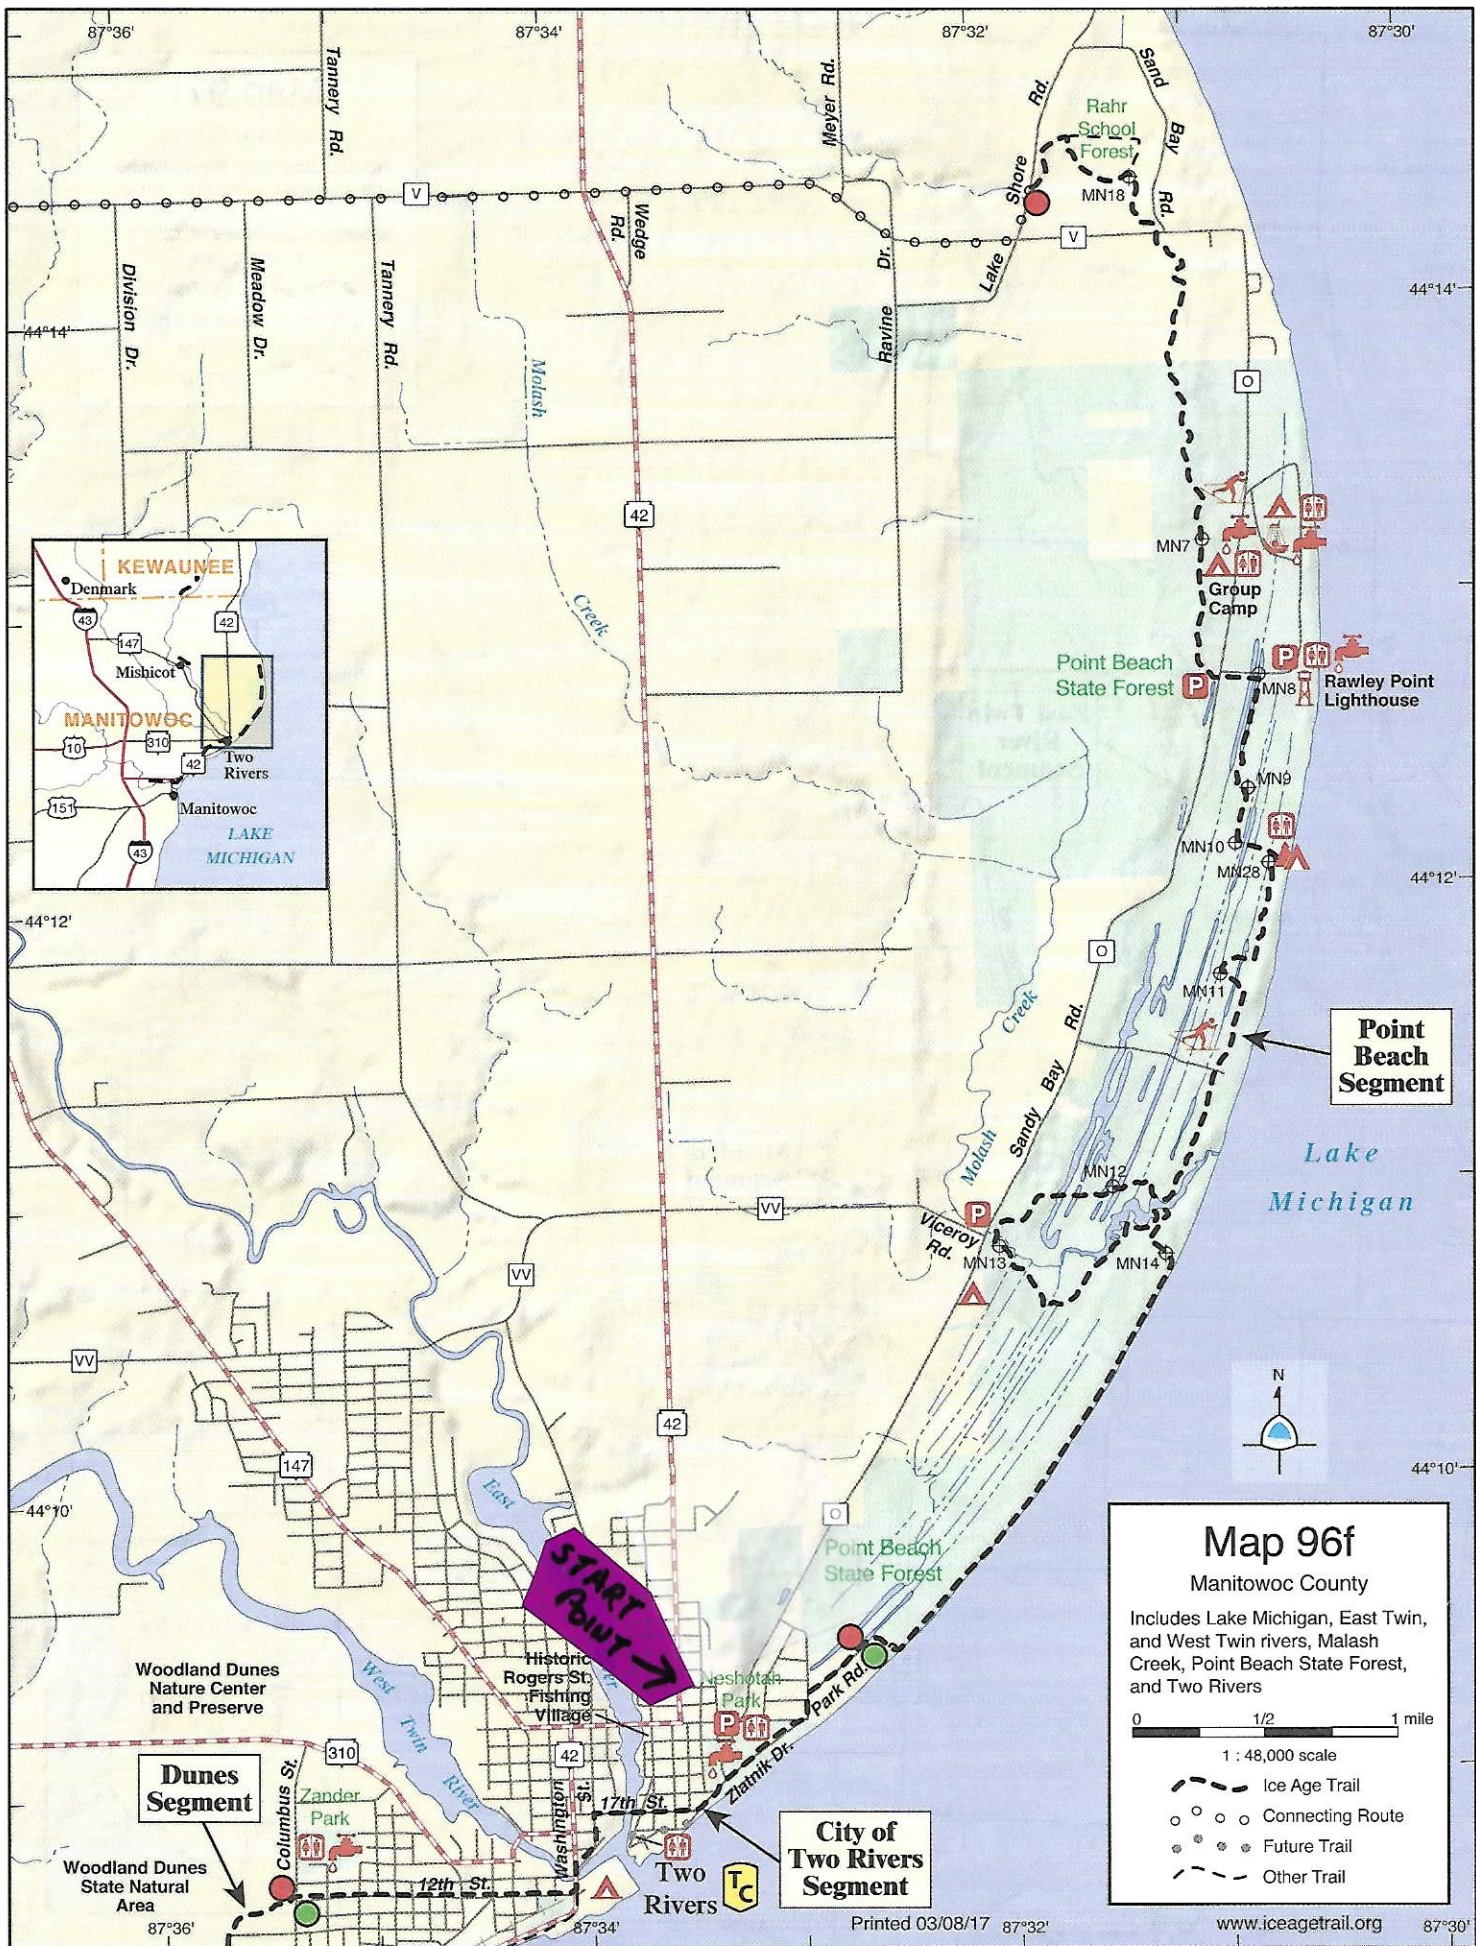

In Case of emergency, dial 911. For an AVA administrative issue, contact the NC Regional Director Jerry Wilson at (cell) 608-695-6449, leave a message, expect a return call as close to immediately as possible.

Congratulations! You have finished this WI IAT route, this is 1 of 16 routes. Don't forget to return to the Online Start Box to check-in within the required timeframe to secure credit for your event and distance books. WI IAT Regional Program credit will be achieved and stored online until all 16 routes have been completed.

This event is sponsored by the North Central Region, American Volkssport Association. Please send constructive comments to NC_RD@AVA.org.

Things to Know - Wisconsin Ice Age Trail (WI IAT) AVA Regional Program

WI IAT AVA Segments: Many Start Point locations have seasonal restrooms and water, some do not. Please read directions in advance and prepare yourself.

Hiking with another person is recommended. These routes were established under the AVA Regional Program "Wisconsin Ice Age Trail" in conjunction with the Wisconsin Ice Age Trail Alliance. These 16 routes are "hikes" rather than walks; although portions of a few routes can be rated below 3C when on bike paths and roads or in urban areas, portions of some could be considered rated 4D.

Drinking water, insect repellent, hiking boots, sunscreen and a hat/cap may be necessary, depending when the trail is hiked. Many will want a walking stick. Checking for ticks after completing a hike is suggested.

Property Types: The Ice Age National Scenic Trail is uniformly marked with yellow blazes, but as a "partnership" project the land ownership and management for the Trail are anything but consistent. The Trail crosses a wide variety of property types, including private lands owned and managed by municipal, county, state and federal agencies. Generally speaking, lands open to public access are shown on maps with green shading. The patchwork of land management also yields different regulations for camping, hiking with pets, parking and so on.

The IAT segments chosen for the Wisconsin Ice Age Trail Distance AVA Regional Program for the most part avoid "connecting routes"; however, some are included but walkers have the option to skip these portions by driving from one trail segment to another. *Disclaimer:* Roads on connecting routes, while legally open to pedestrians, may not have been designed for safe use by pedestrians (in contrast to Ice Age Trail segments). By identifying these routes, neither the Ice Age Trail Alliance, National Park Service, Wisconsin Department of Natural Resources nor the local governmental body, or the American Volkssporting Association, are implying any guarantee about their safety or suitability for Ice Age Trail hikers/walkers.

While AVA participants will be given a route map and limited instructions, to make the participants IAT experience most fulfilling we suggest AVA Regional Event participants consider purchasing the IATA Trail Guidebook for more detail about each segment. The IATA also has a three-ring binder Atlas that has larger segment maps (8.5" x 11") for all segments statewide (over 100 maps). These maps were made available by the IATA for AVA planning use.

IATA provided maps include a green dot and red dot where the local IATA chapters designate the start and end of each segment. These markings rarely coincide with the designated AVA route because we chose to start hikers at locations with parking and allowed hikers to go one direction, the other or both. Hiking both allows longer distance hiking passing your vehicle midway.

When walking, generally follow the yellow blaze IAT signs. Participants will also encounter other IATA signage marking the trail. Refer to the provided map frequently, especially related to leaving parking areas, trail turns and when crossing roads or following roads.

Safety: Personal Safety is a concern when one ventures to unfamiliar places. Always use common sense and take precautions. It is best not to hike alone. Following are some IATA inspired suggestions:

- Leave a trip itinerary with family or friends and stay in contact while away.
- Consider medications that may be needed when leaving home.
- Secure your vehicle and leave nothing in plain sight.
- Carry a cell phone, but realize there may be "no service" portions of trails.
- Avoid camping within a half-mile of road crossings.
- Do not tell strangers where you are headed or plan to camp.
- If you encounter a suspicious person, consider moving to another location.
- Always trust your instincts.
- Take precautions to avoid mosquito & tick-borne illnesses, including insect repellent. Light colors make ticks easier to find. Promptly remove ticks!
- Consider the various Wisconsin hunting seasons when dressing to walk, be visible, "Blaze Orange" and other bright colors are encouraged especially walking September – December.

Examples of IAT Signage:
