TOWNSEND, TENNESSEE

Townsend, located in an area called Tuckaleechee Cove, was first settled by pioneers in the early 19th century. As agriculture was the only economy, farming was the only occupation. Following the Civil War, logging began in earnest with the Little River serving as a natural transport for the logs. Colonel Wilson B. Townsend built a lumber mill and brought the railroad into the area in the early 20th century. The town that grew up here became a company town known as Townsend. By 1910, the Townsend mill was producing 120,000 board feet of lumber per day. Logging operations continued until 1938 when the company offered 70,000 acres to help form the Great Smoky Mountains National Park.

STARTING POINT

The starting point for all three distances is the Townsend Visitor Center, 7906 E. Lamar Alexander Parkway, Townsend, 37882
